Managing Crises in the Oil & Gas Sector

Globally, the gas and oil sectors present energy companies with a particularly good return on investment; but with this unique business prospect comes increased levels of risk.

It is generally agreed that a badly managed risk may elevate to a crisis, and if the correct procedures are not in place, the crisis will quickly evolve into a disaster. This training provides learners with the knowledge and skills needed to mitigate these risks, and effectively deal with any potential fall-out.

Core Content

• An introduction to risk & risk management
• Threats to the Oil & Gas Sectors
• Concepts, principles & characteristics of a crisis
• Identifying a crisis & placing into the correct context & perspective
• Understanding the importance of Pre, During & Post Crisis Management
• Crisis management planning
• The structure & roles of The Crisis Management Team(s)
• Crisis management best practice & international standards

WHO WILL BENEFIT

The course will be of immediate benefit to anyone currently involved in managing risk and crisis within the oil and gas sectors. Further it will benefit operations and facilities managers who may have a vested interest in the sector. This course will equip the learner with the essential measures required to maximise safety and security during a crisis, whilst meeting the realistic constraints of the organisation’s budget.

QUALIFICATION

IQ Level 4

DURATION
