Managing Security Risks in the Oil & Gas Sector

The energy and extraction sectors face continual challenges from man-made threats and natural hazards.

This formal qualification in security in the oil and gas industry is delivered by experts in this field, providing the very latest best-practice guidance. Drawing on case studies from around the world, the course addresses some of the more complex risks associated with the oil and gas industry in a range of environments and examines the risks in Upstream-to-Downstream operations. Delivered by trainers with extensive operational security management experience in the Oil and Gas sector, the course examines and develops risk management theory and applies this to the modules delivered.
