

## Security Coordination & Design

This is an ideal course for any security personnel, who either have experience of security coordination or management, or who are new to the sector. It is perfect for those who wish to support their practical experience with a formal security related qualification.

Delivered by one of our recognised security management trainers, this short course is a comprehensive introduction to the essentials of corporate security management. Suitable for all levels, the training is ideal for those wishing to understand the fundamentals of security.

It is designed to provide security managers, supervisors, and those for whom security is one of a number of responsibilities, with the knowledge and confidence necessary to manage a successful security management function. You will learn the fundamentals of security management with an emphasis on risk methodology and designing appropriate security measures.

The course focuses on the core requirements to secure people and other critical assets, including risk assessments, risk matrix creation, and how to prepare a business case for security provisions to a senior management team.

This programme takes the form of lectures, workshops, discussions and exercises. Learners are placed into groups, who are and tasked with solving typical security problems together.

### WHO WILL BENEFIT

The course is aimed at anyone wishing to learn more about security management, whilst gaining a formal qualification in the field.

### COURSE INFORMATION

#### QUALIFICATION

SRF BTEC Level 4
