## ASIS Certified Protection Professional® (CPP®)

The ASIS CPP® Board certification signifies knowledge and management skills in seven key domains. Through rigorous testing of the seven domains of security, the post-nominals give a true competitive advantage, enhancing career opportunities and performance.

It is one of the most widely recognised security management qualifications in the world, providing employers, colleagues and peers with professional assurance of the holder's advanced knowledge of security management.

### About the exam:

The CPP® exam consists of 200 scored multiple-choice questions and may contain 25 “pre-test” (unscored) questions randomly distributed throughout the examination, for a total of 225 questions. The time allowed takes into consideration the review of pre-test items.

The exam covers tasks, knowledge and skills in seven broad domains that have been identified by Certified Protection Professionals as the major areas in security management.

### Core Content

- Security principles & practices
- Business principles & practices
- Investigations
- Personnel security
- Physical security
- Information security
- Crisis management
- Legal aspects (UK candidates only)
